

Smartphone access to your CCTV system - Updated March 2016 (Ref 7-9)

The following instructions are for connecting iPhones/iPads and Android based tablets and smartphones remotely to your DVR CCTV system.

- 1. For **IOS Devices (Apple)** Go to the Apple App Store, search for topsview, download the app and install it.
- 2. For **Android** devices Go to the Google Play store, search for topsview, download the app and install it.

You need to create an account first

TopsView	Enter a rea	l email ac	count that you use and create a password for topsview.	
	Do not use the password to your email account.			
keith@eloise.tv	Make a mote of this password somewhere, as you will need this if you want to install on another device.			
Login	Once registered, if you forget the password you can use the "Forgot pwd" button and it will email a new password to your registered email address.

Enter your details

Name – This can be anything you want

GID – This is usually 10 digit alphanumeric beginning with "av"

Name

GID

Name

GID

User – admin (all lower case)

Password - As advised to you be text or email

Channel number – Leave as auto or select the number of cameras you have

Hit the "Sure" button, then your devices back key to return to the previous screen.

Your system should appear beside the "+" key

Touch the icon with your system name and your channels should open automatically.

All other menu items are designed to be intuitive, so 5 minutes roaming around should explain how the who app works.

If you want to add to another device (phone or iPad etc...) if you use the same ulogin and password, everything will already be set up for you.
